

### NOW YOU SEE WHAT WE SEE

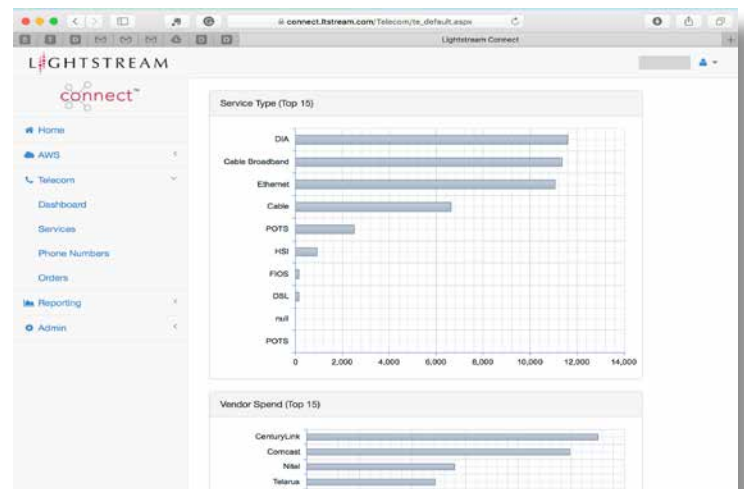

**Lightstream Connect™** is a proprietary and unique intelligent billing analytics tool that provides a holistic and detailed view of your entire **cloud** and **telecom** inventory and utilization in one place. Connect is an easy-to-use “single pane of glass” solution that helps you understand your spend so you can focus on what really matters - your core business.

### FOR TELECOM

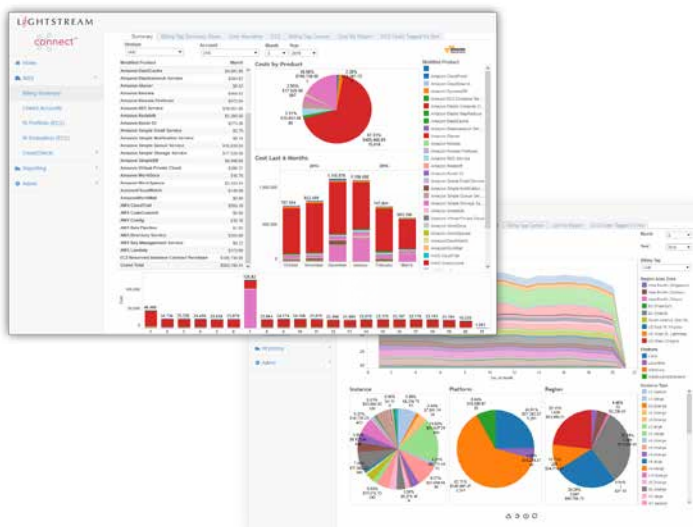

**Lightstream Connect™** displays an all-inclusive list of your telecom services with order status and management features including circuit location and ID, status, recurring monthly charges, expiration dates and billing tags. We can even integrate monitoring statistics.

### DASHBOARDS & MANAGEMENT REPORTS

A customizable dashboard displays service types, spend by service provider, and other key measurements so that you can make knowledgeable business decisions regarding your telecom infrastructure.

# Understand your Spend

### FOR CLOUD

Connect gives you a detailed breakdown of your AZURE and AWS spends with in-depth product summary and cost analysis that provides vital information about your entire cloud inventory, utilization and monthly recurring charges. You can manage your entire cloud infrastructure from one unified console and share or download reports with other stakeholders.

### SUPPORTED CLOUDS

ONE PLACE TO ANALYZE YOUR  
CLOUD & TELECOM SPEND

## LIGHTSTREAM CONNECT GIVES YOU INSIGHT INTO YOUR CLOUD & TELECOM ENVIRONMENTS

Lightstream Connect gives you a complete and daily view of your both your telecom and cloud environments in a useful and informative way. We work with you and to create the appropriate tagging and grouping of accounts and services to improve the overall usability of information for all levels of you organization -- from executives to administrators.

### HOLISTIC PLATFORM OPTIMIZATION

Our deep understanding of telecom and cloud environments combined with our engineering expertise and direct connection with all of the top providers allows us to identify optimization opportunities, such as upgrading from legacy to newer technologies, combining and consolidating or right-sizing underutilized resources, and more.

### INSIGHT FOR AWS SAVINGS PROGRAM

Lightstream offers a financial savings program as a managed service to financially optimize your AWS environment to produce monthly savings. Our **Insight Managed Savings for AWS** uses sophisticated analytical models that maximize the alignment and use of AWS Reserved Instances where they can be shown to consistently save you money. Signing up for the service doesn't affect or interrupt your existing Amazon Web Services in any way. And, you get CloudCheckr for free.

Lightstream Connect directly integrates with all of the major service providers so you can see what we see. Lightstream is an established and trusted partner of the world's top technology providers including Amazon, Microsoft, IBM, Verizon, CenturyLink, Comcast, Rackspace, and many others. We have extensive engineering, implementation, and support resources to help you with your cloud, telecom and managed services needs.

and many others...
