

## We'll Help You Optimize Your AWS Spend

### ABOUT INSIGHT FOR AWS

**Lightstream Insight™ for AWS** is a Managed Financial Savings Program for AWS that is designed to save you as much as 20% on your EC2 instances and optimize your AWS spend. In addition to being a managed service, Insight for AWS includes a **Lightstream Connect™**, our web-based cloud analytics tool to help you understand and optimize your environment.

Insight for AWS leverages Lightstream Connect, our cloud analytics engine, and a team of AWS experts that know how to maximize and align the right AWS services for your environment.

When your AWS accounts are linked to Lightstream, the service is free. If you are not linked, there may be a nominal fee. Signing up for Insight has no effect on your existing Amazon Web Services, it just means you'll now be paying less money for the same services that you already use and enjoy, plus the benefits of having additional support, and a state-of-the-art billing optimization service at no additional extra cost.

### PROGRAM FEATURES

- **Managed Optimization & Savings Program**
- **Lightstream Connect Software**
  - AWS Analytics, Utilization & Usage
  - Graphical Dashboards & Reports
  - Support for Custom Tagging
- **CloudCheckr Software**

#### Lightstream Connect Screenshots (Above)

Lightstream Connect is a web-based cloud billing and analytics tool that is included with your Insight for AWS Service. Connect gives you a complete view of your entire AWS environment and includes usage and utilization analysis, custom reports and support for custom tagging for cost allocation.

## You also get CloudCheckr™

Lightstream Insight for AWS service includes CloudCheckr enabling you to further analyze your AWS implementation. CloudCheckr gives you access to information regarding what your organization has running in AWS, changes in user access privileges, changes in your environment, unused or underutilized cloud resources, recommendations for best practices for your organization and much more.
